

Charge point management

Manage charging networks easily and flexibly

Individually **adaptable**

and user-friendly

Optimal **utilization**

of existing network connection capacity

- Flexible remote management of charge points
- Easy integration into existing energy management systems and integration of locally produced energy
- Scalable service that adapts flexibly to the number of charging stations
- Smart, cost-optimized load management based on customizable parameters and interfaces
- Great flexibility in the distribution of energy to the charge points
- User-friendly, adaptable web application with personalizable dashboards
