

Energy

High-pressure pump

High pressure for optimum mixture preparation

Increased delivery rate

up to 1.3 ccm/rev.

Extensive variant frame

for different powertrains

- Bosch offers two versions of the high-pressure pump for different powertrains, with system pressures of up to 250 bar and up to 350 bar, respectively
- Increased flexibility regarding types, positions and angles of hydraulic and electrical connections
- Best NVH properties in its class
