

Software
and Services

Vehicle connectivity services

Flexible, scalable, and secure
solutions for vehicle manufacturers

Compliant

Helps manufacturers to meet the requirements of UNECE R 155 and 156 in the context of over-the-air updates and diagnostic functions

Tried and tested

Hundreds of thousands of vehicles worldwide are already connected via the Bosch solution

- Modular toolkit for connecting vehicles efficiently and keeping their software up to date
- Services can be used flexibly and according to the specific use case
- Future-proof thanks to the ability to develop new functions and business models
- Secure solution for over-the-air updates supports compliance with applicable regulations
- Comprehensive package enables seamless integration, high performance, and long-term scalability
- Option to develop own applications that can be run on the device
